Mark Scheme

2008 examination – June series

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available to download from the AQA Website: www.aqa.org.uk

Set and published by the Assessment and Qualifications Alliance.

MARK SCHEME

Information to Examiners

1. General

The mark scheme for each question shows:

- the marks available for each part of the question
- the total marks available for the question
- the typical answer or answers which are expected
- extra information to help the Examiner make his or her judgement and help to delineate what is acceptable or not worthy of credit or, in discursive answers, to give an overview of the area in which a mark or marks may be awarded.

The extra information is aligned to the appropriate answer in the left-hand part of the mark scheme and should only be applied to that item in the mark scheme.

At the beginning of a part of a question a reminder may be given, for example: where consequential marking needs to be considered in a calculation; or the answer may be on the diagram or at a different place on the script.

In general the right hand side of the mark scheme is there to provide those extra details which confuse the main part of the mark scheme yet may be helpful in ensuring that marking is straightforward and consistent.

2. Emboldening

- 2.1** In a list of acceptable answers where more than one mark is available ‘any **two** from’ is used, with the number of marks emboldened. Each of the following lines is a potential mark.
- 2.2** A bold **and** is used to indicate that both parts of the answer are required to award the mark.
- 2.3** Alternative answers acceptable for a mark are indicated by the use of **or**. (Different terms in the mark scheme are shown by a / ; eg allow smooth / free movement.)

3. Marking points

3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which candidates have provided extra responses. The general principle to be followed in such a situation is that ‘right + wrong = wrong’.

Each error/contradiction negates each correct response. So, if the number of error/contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as * in example 1) are not penalised.

Example 1: What is the pH of an acidic solution? (1 mark)

Candidate	Response	Marks awarded
1	4,8	0
2	green, 5	0
3	red*, 5	1
4	red*, 8	0

Example 2: Name two planets in the solar system. (2 marks)

Candidate	Response	Marks awarded
1	Pluto, Mars, Moon	1
2	Pluto, Sun, Mars, Moon	0

3.2 Use of chemical symbols / formulae

If a candidate writes a chemical symbol / formula instead of a required chemical name, full credit can be given if the symbol / formula is correct and if, in the context of the question, such action is appropriate.

3.3 Marking procedure for calculations

Full marks can be given for a correct numerical answer, as shown in the column 'answers', without any working shown.

However if the answer is incorrect, mark(s) can be gained by correct substitution / working and this is shown in the 'extra information' column;

3.4 Interpretation of 'it'

Answers using the word 'it' should be given credit only if it is clear that the 'it' refers to the correct subject.

3.5 Errors carried forward

Any error in the answers to a structured question should be penalised once only.

Papers should be constructed in such a way that the number of times errors can be carried forward are kept to a minimum. Allowances for errors carried forward are most likely to be restricted to calculation questions and should be shown by the abbreviation e.c.f. in the marking scheme.

3.6 Phonetic spelling

The phonetic spelling of correct scientific terminology should be credited **unless** there is a possible confusion with another technical term.

3.7 Brackets

(.....) are used to indicate information which is not essential for the mark to be awarded but is included to help the examiner identify the sense of the answer required.

COMPONENT NUMBER: BLY2H**COMPONENT NAME: Additional Science / Biology****STATUS: Final****DATE: June 2008**

question	answers	extra information	mark
1(a)	lipase	allow phonetic spelling allow lipidase	1
1(b)(i)	fall then rise owtte eg down then up minimum / least / fastest / best / optimum at 39–41(°C)	allow faster then slower ignore explanations allow it falls to 40(°C) if no other marks gained, ‘falls to an optimum’ gains 1 mark	1 1
1(b)(ii)	(yes) any two from: <ul style="list-style-type: none"> • less heat / energy / electricity / power required / used / wasted • conserves fuel supplies or less fuel used • less pollution from power stations owtte 	there is no mark for circling ‘yes’ maximum 1 mark if No is circled ignore lower temperature accept less global warming or less CO ₂ / carbon emissions / greenhouse gases or less SO ₂ / acid rain NB only direct effects less pollution only is not enough	2

Question 1 continued on next page...

COMPONENT NUMBER: BLY2H**COMPONENT NAME: Additional Science / Biology****STATUS: Final****DATE: June 2008****Question 1 continued...**

question	answers	extra information	mark
1(c)	any two from: <ul style="list-style-type: none">• enzyme / lipase• destroyed / denatured• reference to (specific) shape changed	max 1 mark for reference to cell accept any named enzyme allow damaged / broken down not 'killed' ignore detergent / it	2
Total			7

COMPONENT NUMBER: BLY2H**COMPONENT NAME: Additional Science / Biology****STATUS: Final****DATE: June 2008**

question	answers	extra information	mark
2(a)	cell membranes		1
2(b)(i)	two recessive / cystic fibrosis / faulty / diseased / the allele(s) / genes	two can be implied by second marking point ignore chromosomes	1
	from Bob and Carol / both parents / the parents	if no other marks awarded 'Carol is a carrier' gains 1 mark	1
2(b)(ii)	(inherited) dominant / normal allele / gene		1
	from Carol / mother	ignore references to recessive allele / gene from father / Bob if no other marks awarded he has <u>just</u> / <u>only</u> one recessive allele gains 1 mark	1
2(c)(i)	reduce number of people with cystic fibrosis (in population) or reduce health-care costs or expensive to have baby with cystic fibrosis	accept to allow decision / emotional argument qualified eg allows abortion or allows people to make choices about termination or help to prepare financially / emotionally etc	1

Question 2 continued on next page...

COMPONENT NUMBER: BLY2H**COMPONENT NAME: Additional Science / Biology****STATUS: Final****DATE: June 2008****Question 2 continued...**

question	answers	extra information	mark
2(c)(ii)	any one from: <ul style="list-style-type: none">• possible damage / risk to embryo / fetus / baby• screening / it is expensive• (may) have to make ethical / moral / religious decisions• right to life	allow possible harm / risk to mother ignore not natural / playing God / unethical / immoral / religious unqualified	1
Total			7

COMPONENT NUMBER: BLY2H**COMPONENT NAME: Additional Science / Biology****STATUS: Final****DATE: June 2008**

question	answers	extra information	mark
3(a)	8.3 or 8.3 recurring or 8	award both marks for correct answer, irrespective of working 7 / 84×100 or equivalent for 1 mark	2
3(b)	any three from: <ul style="list-style-type: none"> • heat • respiration • movement or example of movement eg exercise / kinetic • faeces / waste / urine / excretion / urea 	allow keeping warm not for respiration ignore eggs / sound	3
3(c)	any one from: <ul style="list-style-type: none"> • less / no movement • less / no heat loss • reference to selective breeding • reference to controlled / better / more feeding 	allow examples of movement	1
3(d)	any two from: <ul style="list-style-type: none"> • less steps in food chain • less losses of biomass / energy / examples of losses • cheaper to feed herbivores 	allow dangerous to keep carnivores herbivores contain more energy is insufficient	2
Total			8
